EXTERNAL  
QUALITY

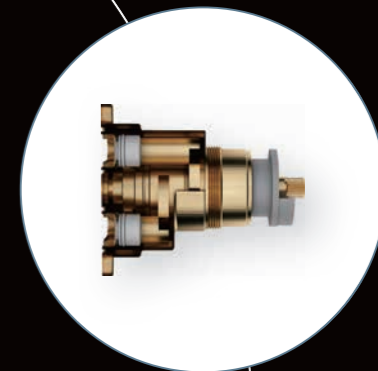

#### WIDELY APPLICABLE

Flexible design, suitable for both constant temperature and non constant temperature waterway systems

#### SEPARATE DESIGN

The embedded box and control valve are designed separately, and they are installed separately without delaying the construction period

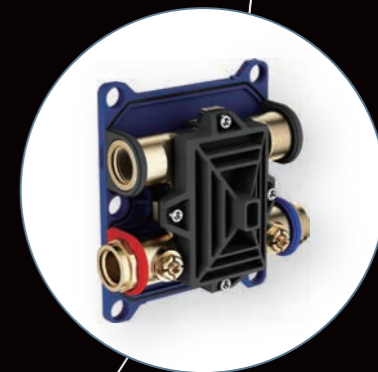

#### SAFETY AND COMFORT

The valve body is equipped with safety airbags and silencers, which effectively reduce vibration and reduce the noise generated by the flow of bubbles in the water pipe

#### DESIGN FOR WATER TESTING

Independent water testing baffle design effectively prevents the valve body from directly participating in the water testing process, improving construction efficiency

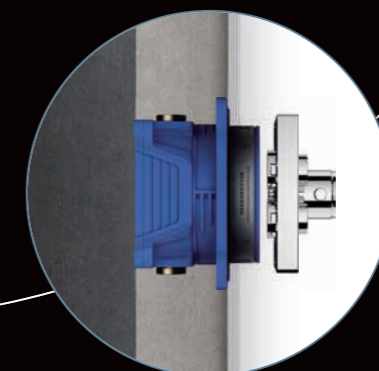

#### ARRANGEMENT OF WATERWAYS

Flexible layout of waterways, meeting more regulatory requirements, facilitating quick installation by construction personnel

#### MULTI FUNCTIONAL DESIGN

Prevent the interconnection of hot and cold water, conduct high and low pressure testing, and flush the pipeline

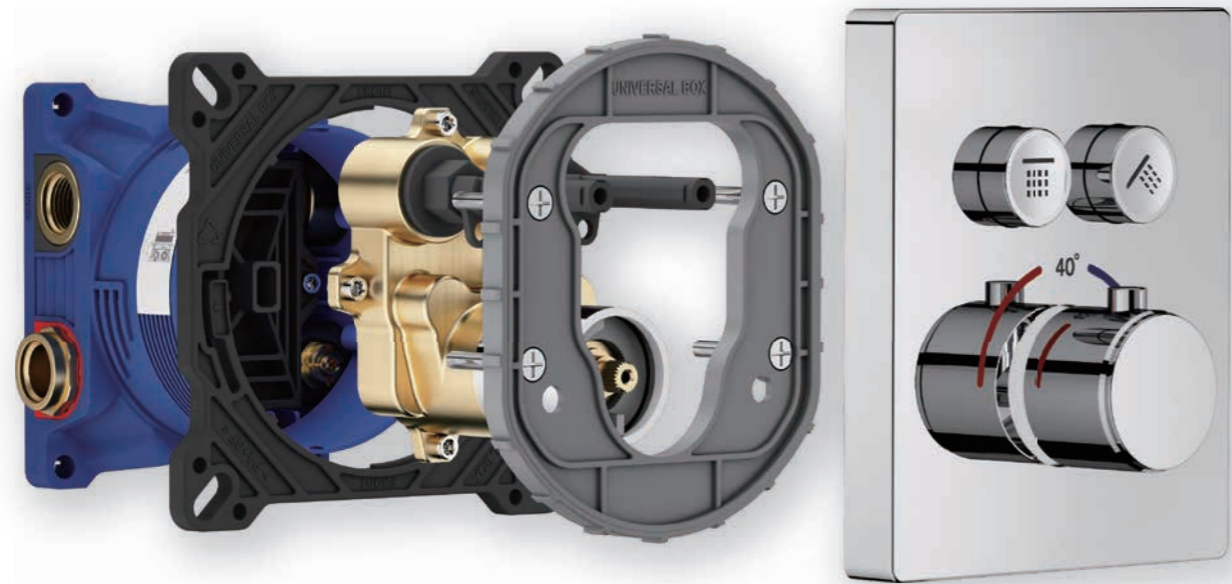

#### STRONG WALL ADAPTABILITY

Whether it is a hollow wall or a solid wall, it can be easily installed, ensuring convenience and universality of installation

#### COMPLETE PROTECTIVE MEASURES

Equipped with independent protective covers, effectively protecting the valve body from external environmental influences during decoration
